

Sejal Shinkar

Pune, Maharashtra, India

+91 9511735932 — sejalshinkar1510@gmail.com — LinkedIn — GitHub

Portfolio — CodeChef — LeetCode — GFG

Education

B.Tech in Information Technology (Pre-Final Year)

Pune Institute of Computer Technology (PICT)

Activities: Web Team Member, PCSB Club

2024 – 2028

CGPA: 9.42

Higher Secondary Certificate (HSC)

MRMV Junior College of Science, Manmad

2024

Percentage: 95.00%

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C, C++, SQL

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Role-Based Access Control (RBAC), Data Validation

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3

Databases: PostgreSQL, MySQL, MongoDB, Schema Design, Indexing

Tools & Platforms: Git, GitHub, Linux, Docker, Postman, MongoDB Atlas, Vercel, Render, CI/CD Basics

AI & Automation: Generative AI Fundamentals, Prompt Engineering, NLP Pipelines, GPT-based Workflows

Core Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networks, System Design Fundamentals, Agile/Scrum Methodology, SDLC

Problem Solving: 100+ problems solved on LeetCode & GeeksforGeeks (Java, C++); CodeChef 500-level difficulty problems completed (certified)

Experience

Product Intern – Technology, TPOBridge (Remote)

Mar 2026 – Jul 2026

- Tested core features and user flows across two live platforms, **TPOBridge** and **PlacementEdge**, to ensure functionality and reliability.
- Identified, documented, and tracked bugs through resolution in collaboration with the development team, and analyzed platform usability to recommend feature improvements.
- Delivered regular UX feedback and collaborated cross-functionally with Product and Technology teams to support planning, testing, and delivery of key initiatives.

Artificial Intelligence Intern – Infosys Springboard (Virtual)

Aug 2026 – Present

- Selected for the Infosys Springboard AI Internship under Pragati: Path to Future, Cohort 8, after clearing prerequisite AI learning pathways and technical assessments.
- Gaining hands-on experience in Generative AI, NLP pipelines, and prompt engineering, applying GPT-based model workflows through a structured training curriculum and project-based exercises.

Projects

Full Stack Developer – CiviQ (Citizen Issue Management Platform) (Live — GitHub) Feb 2026 – Present

- Architected and deployed a scalable, multi-tenant MERN-based complaint management system for Residents, Technicians, and Administrators using Agile sprints for iterative delivery; developed 31 REST APIs secured with custom JWT authentication middleware and role-based access control, achieving 98ms average response time via indexed compound MongoDB queries.
- Designed a weighted technician assignment algorithm to automate complaint routing, and built an auto-failover notification system (Brevo to SendGrid) with 100% success rate under API stress testing – an escalation/reminder pattern directly applicable to automated care-coordination workflows.
- Validated system reliability and data integrity with 92% test coverage using Vitest unit tests and Playwright end-to-end flows.

Full Stack Developer – Nxt2Campus (MHT-CET College Predictor) (Live — GitHub) Jun 2025 – Aug 2025

- Built a full-stack admission guidance platform with Node.js, Express.js, and MongoDB, implementing a percentile and cutoff-based prediction model trained on historical MHT-CET admission data across 10 colleges.
- Designed REST APIs and a responsive, mobile-friendly UI that consolidated college shortlisting into a single guided workflow for students.

Frontend Developer – EquiTrack (Real-Time Stock Tracker) (Live — GitHub)

Jul 2025 – Aug 2025

- Engineered a real-time stock tracking dashboard with JavaScript and Tailwind CSS, integrating live market data APIs with Chart.js to visualize price trends and key financial metrics.
- Added stock search, a metrics dashboard, and scheduled auto-refresh to keep data current without manual reloads.

Achievements & Hackathons

- Co-developed **SCRIBE AML**, an AI-powered Suspicious Activity Report generator, at **Barclays Hack-O-Hire 2026**.
- Built **ManoSakha**, an AI-powered mental health assistance platform, at **TechFiesta 2026**.
- Shortlisted in the college-level round of **Smart India Hackathon 2025** for a metro-planning solution (K-INDS).
- Built **EcoTrace**, a carbon footprint awareness platform, at **Hack2Skill Prompt Wars Challenge 3**.
- Secured **Rank 176** in **ICPC AlgoQueen Quest**, a competitive algorithmic problem-solving contest.
- Secured **1st Rank** at the Taluka level in the HSC Board Examination.

Certifications

- Principles of Generative AI** – Infosys Springboard
- Data Structures & Algorithms in Java** – Course Completion Certification
- CodeChef – Problem Solving Certification** (500 Difficulty Level)
- NPTEL – Enhancing Soft Skills and Personality** — Elite + Gold — Score: 91% — IIT Kanpur
- Architecting Cloud Computing Solutions on Microsoft Azure** – Infosys Springboard
- AWS Cloud Fundamentals** (Lambda, S3, EC2, IAM, DynamoDB) – Infosys Springboard & College Workshop
